

A scrumptiously tasty litepaper of [DogeSnacks.org](https://dogesnacks.org)

The background is a dark blue space scene filled with numerous small white stars. There are several larger, brighter stars and some nebula-like cloud formations in shades of blue and purple. In the bottom left corner, there is a small, textured purple sphere. In the bottom right corner, there is a small, textured brown sphere.

DogeSnacks is a decentralized and permissionless crowdfunding platform that makes raising capital accessible, transparent, fair and above all tasty. The launchpad gives emerging DeFi projects owners the power to distribute tokens, raise liquidity, and pledge security to their investors. The DogeSnacks-protocol executes token allocation, liquidity pool creation, liquidity locking, and direct listing on Uniswap autonomously. Everything ready for public trading.

SNACKS

\$SNACKS is the community token of DogeSnacks, with an innovative deflationary mechanism that includes a redistribution and burning system that rewards all its holders. With only 420,000,000 \$SNACKS in existence, a couple of yummy snacks is all you need to hold for that sugary sweet accrued value.

Floating on a scrumptious pasture among the clouds, where tranquility and gustatory cells meet, there you will find the community vault named The Golden Tuck Shop. The sole purpose of this vault is to serve, reward, and safeguard the fellowship of \$SNACKS.

Tokenomics

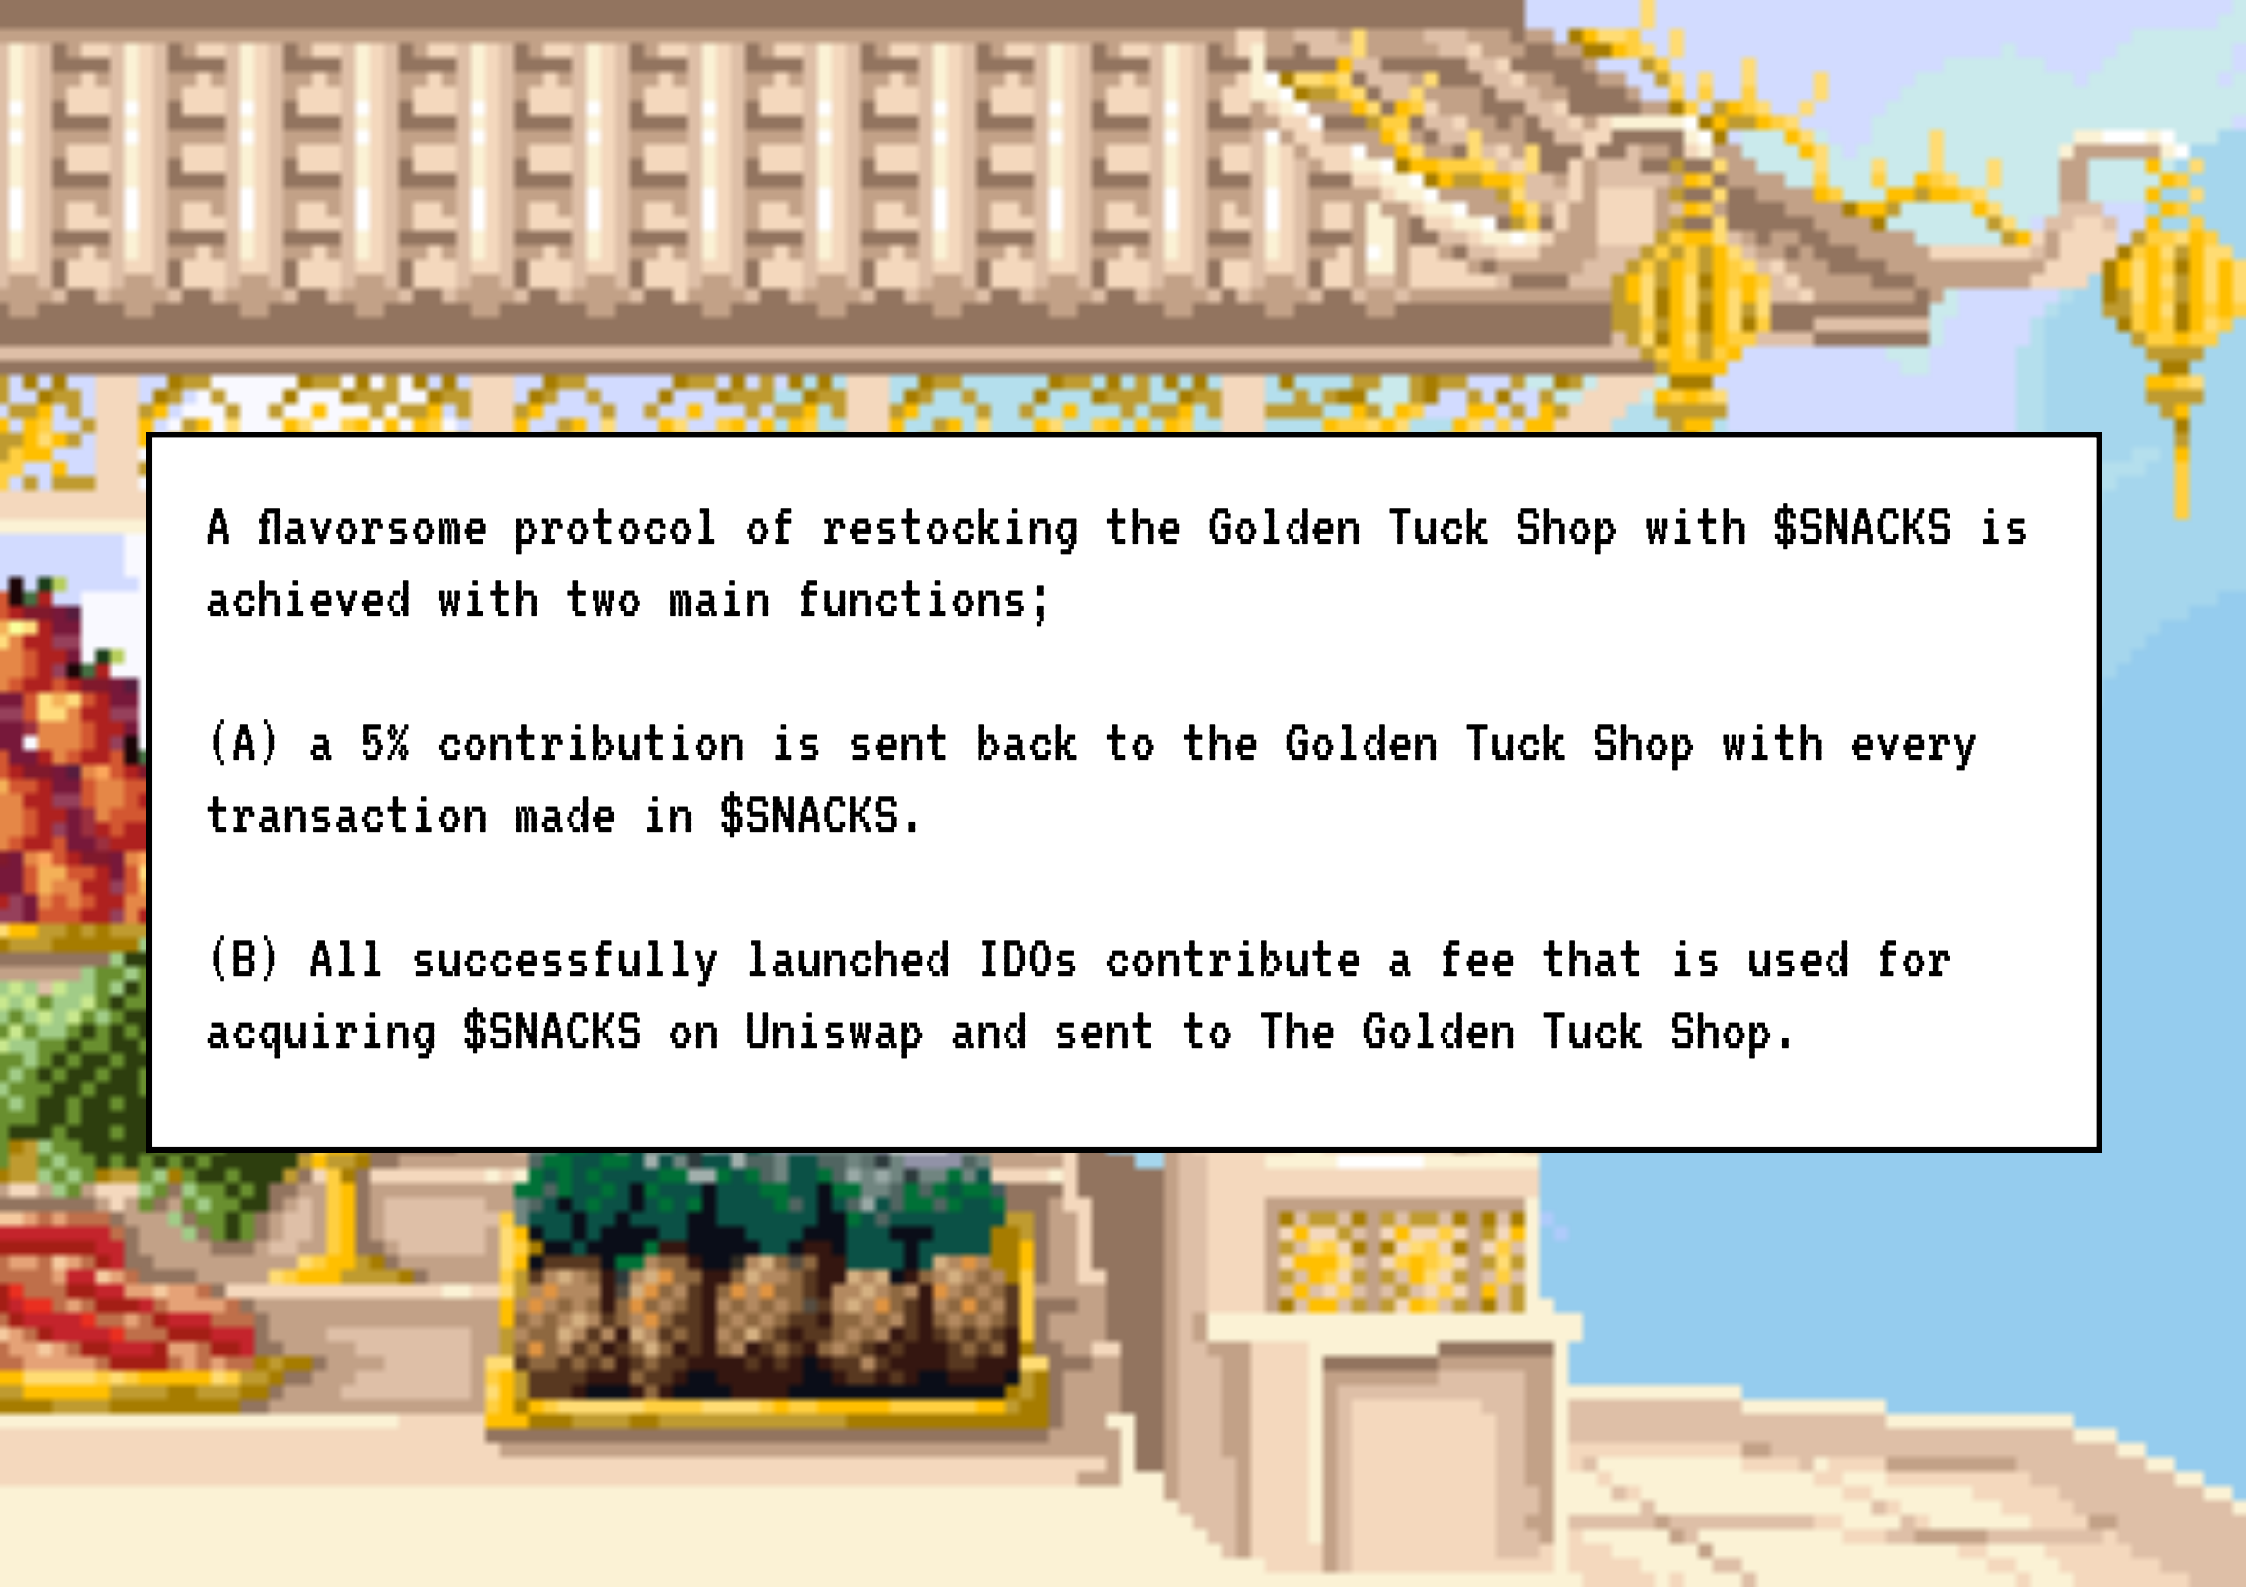

DogeSnacks IDO	239.400.000 \$SNACKS
----------------	----------------------

Liquidity Pairing	70.000.000 \$SNACKS
-------------------	---------------------

The Golden Tuck Shop	42.000.000 \$SNACKS
----------------------	---------------------

Project Fund	68.600.000 \$SNACKS
--------------	---------------------

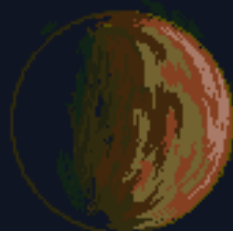

Total Supply	420.000.000 \$SNACKS
--------------	----------------------

A flavorsome protocol of restocking the Golden Tuck Shop with \$SNACKS is achieved with two main functions;

(A) a 5% contribution is sent back to the Golden Tuck Shop with every transaction made in \$SNACKS.

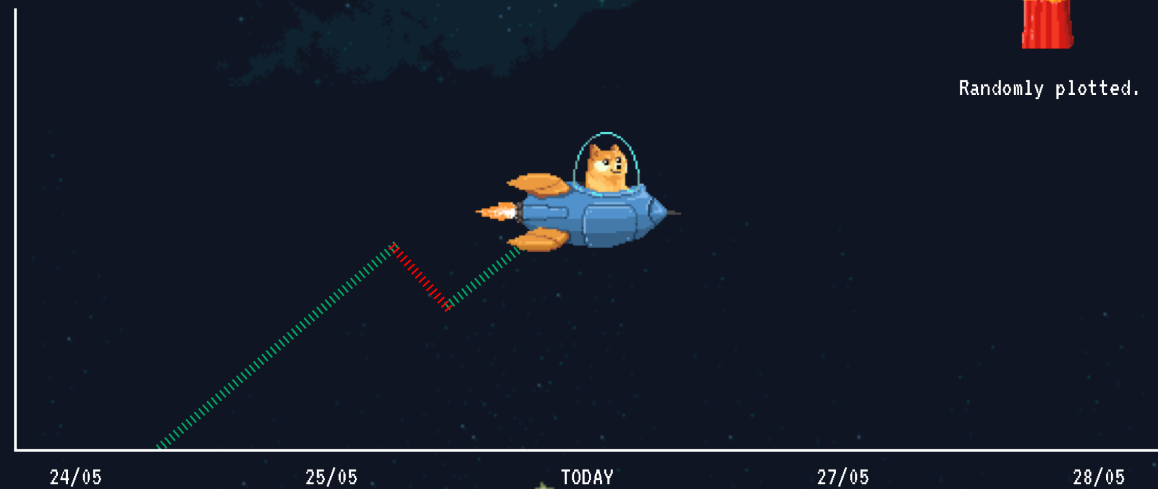

(B) All successfully launched IDOs contribute a fee that is used for acquiring \$SNACKS on Uniswap and sent to The Golden Tuck Shop.

Randomly plotted.

Every 24-hours, snacks are randomly generated and placed on the \$Doge Market Chart, which is found on the DogeSnacks landing page.

\$DOGE Market Chart

The goal is for Doge, the little dog in the spacecraft, to eat the snacks on the chart, triggering a specific event within The Golden Tuck Shop. Navigating the spaceship is dependent on the \$DOGE cryptocurrency price; if the market price of \$DOGE goes up or down, so does Doge in the spacecraft.

Depending on the type of snack that gets eaten, an event is triggered at the Golden Tuck Shop rewarding holders through a delectable deflationary mechanism, which includes redistribution and burning.
